

For our headquarter in Vienna we are looking for a

DevOps Engineer (w/m/x) 80-100%

Join Anovis as a DevOps Engineer at our Vienna headquarter!

In this key role, you will be responsible for the design, implementation, and management of our server-side infrastructure with a focus on automation, scalability, and reliability. Your extensive knowledge in Windows and Linux server administration, scripting, and DevOps practices will play a crucial role in optimizing and maintaining our systems, ensuring smooth collaboration.

At Anovis, a leading managed service provider, you will benefit from regular professional exchange with your colleagues and specialists in the sister companies of the [CymbiQ-Group](#).

Our colleagues are what is most important to us, which is why we at Anovis pursue a modern and employee-centred corporate culture and have been honoured as a top employer on various sites (e.g. [Kununu](#), [CHIP](#), [Great-Jobs.org](#)).

Your responsibilities

- You are responsible for the management and maintenance of Linux servers.
- You oversee the handling and resolution of incidents and issues in the Linux environment.
- You perform regular maintenance work, including updates and patching.
- You develop and implement automation solutions to increase efficiency and optimize processes.
- You are responsible for the maintenance and further development of the monitoring system, including the creation of custom checks.
- You actively participate in projects related to open-source software operation and Linux infrastructure, both for customers and internal stakeholders.

ANOVIS.COM

Your profile

- Completed technical education and (some) professional experience in system administration, DevOps, or open-source development.
- Experience in Linux server administration (Ubuntu, CentOS):
 - Basic server administration
 - Extensive command-line interface (CLI) knowledge
 - Bash scripting experience
- Profound knowledge of Linux open-source software products such as:
 - Database systems (e.g., Postgres, MySQL)
 - Web and application servers (Apache, Nginx)
 - Monitoring (Nagios-based systems, CheckMK)
 - Automation & orchestration (Puppet, Ansible, Stackstorm)
 - Know-how and experience with cloud infrastructure (PaaS, IaaS)
- Ideally, basic programming and scripting skills in one of the following languages: Python, JavaScript.
- Willingness to learn other programming languages as needed.
- Experience with REST and SOAP APIs as well as source code management (e.g., GIT).
- Understanding of software lifecycle management.
- Strong service and customer orientation.
- Self-initiative, precision, and strong problem-solving skills.
- High social competence and excellent communication skills when dealing with colleagues, customers, and partners.
- Good knowledge of German and English (at least B2 level) in both spoken and written communication.

Our offer

- A varied, interesting job in an innovative, leading, internationally active IT company
- Integration into a dynamic and top-motivated team of highly qualified specialists
- Numerous opportunities for participation and development
- Gross annual salary 35.000-43.000€ (38,5h/week), based on the fulfilment of the job profile and the IT-KV
- Active promotion of work-life balance (including **up to 29 additional leave days**)
 - 6th week of annual leave
 - Flextime model without core time + 2 flex days/month
 - Reduced working hours (30-38.5 hours/week)
 - Home office (up to 80%)
- Comprehensive training, internal and external further education, and promotion of individual development opportunities
- Joint celebrations in summer and winter, as well as regular team events & after-work parties

About Anovis

As part of the Swiss [CymbiO Group AG](#), Anovis operates thousands of IT security systems for globally active companies worldwide in cooperation with renowned partners such as A1 Telekom Austria, T-Systems, British Telecom, Cisco and Barracuda Networks, Extreme Networks, Palo Alto, Airlock Proofpoint or Riverbed. With our headquarters in Vienna and branch offices, we offer comprehensive services in the area of connectivity and security. Our services range from conception and implementation to 24/7 operational management of globally distributed IT systems. Our experts work closely with our partners to develop flexible, forward-looking and cost-effective solutions that guarantee security and effectiveness and protect investments.

Anovis understands the IT infrastructure, network and IT security needs of customers and provides a highly skilled professional services and operations team to respond quickly and flexibly to ensure a customised, highly accessible IT infrastructure.

We explicitly encourage all people to apply regardless of gender, age, skin colour, sexual orientation, physical & mental abilities, origin or other protective characteristics.

We look forward to your application!
